

One Day + Remote Certification

We recognize that not everyone can take three days in a row to attend the certification so we are offering a one day + remote option. This option requires more homework from the participant and takes longer to get certified. However, it has some unique benefits:

- Participants will have flexibility to go through the material at their own pace
- Participants will receive more coaching while applying the tools at work

What's the Same

- Cost is same as three day. See workshop schedule for updated pricing.
- Content of three day will be covered

What's Different

- One day of Change Management Classroom training instead of three
- Participant will be assigned homework that requires up to a full day of work before the one day session
- Participants will get periodic work assignments after the one day to cover the rest of course material. These work assignments will be reviewed by one of the authors
